

It's the first attraction invented by Mel Park, very beautiful, born with the concept of the spaceship sent in the space.

It has a lot of movements: slope, arm rotation and car rotation.

It's possible to build it both with open and closed gondolas.

At present the most successful version is the one with open gondolas.

Already homologated TÜV Munich.

Road model	available
Park model	available
Gondolas	2x16 seats, 32 seats total
Front	17 mt (56 ft.)
Depth	17.7 mt (58 ft.)
Height	12 mt (39 ft.)
