

A roller coaster with orange and black cars looping around a central structure against a blue sky. The cars are filled with people, and the track is decorated with lights. The text 'TECHNICAL PARK' is overlaid on the top right, and 'swing & loop collection' is overlaid on the bottom right.

Innovation by Technical Park

Technical Park has a wide variety of pendulums, ranging from an ordinary swing to a complete inversion experience with or without car loop effect. From tiny indoor shopping mall swingers to full size, high capacity multi-looping inversion rides, our engineers are ready to take on your next project in many different configurations and sizes, fully engineered and ready for production. We are continuously looking for and researching configuration in order to improve our quality and high standards - working to developing new innovative models.

PARK**

Street Fighter 16

Iconic masterpiece

With high marketability, lots of fun and suitable for a large public. It is our entry level thrill pendulum ride. This ride has two exciting elements: $\pm 120^\circ$ arch with boosted fall and gondolas spin at variable speeds. Large comfortable seats with big back shields for theme purpose, silent and maintenance free transmission without pinion and high tech control system with double drive make this ride a top class choice in comparison to any competitor.

**TECHNICAL
PARK**

Meaningful elements:

- Boosted arch $\pm 120^\circ$
- Elastic couplings maintenance free
- Advanced troubleshooting tech

Street Fighter Revolution 16

Iconic masterpiece

With high marketability, lots of fun and suitable for large public it is our entry level thrill pendulum ride. This ride has two exciting elements: $\pm 360^\circ$ arch with boosted fall and gondolas spin at variable speeds. Large and comfortable seats with a big back shield for themeng purpose, silent and maintenance free transmission without pinion and high tech control system with double drive make this ride a top class choice in comparision with any competitor.

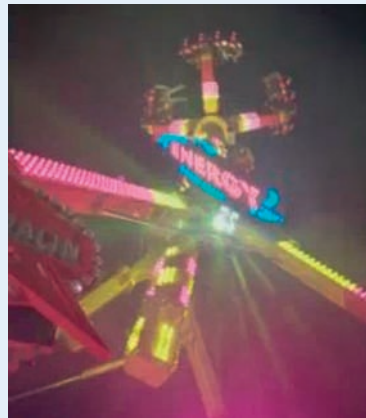

**TECHNICAL
PARK**

Meaningful elements:

- Boosted arch $\pm 360^\circ$
- Elastic couplings maintenance free
- Advanced troubleshooting tech

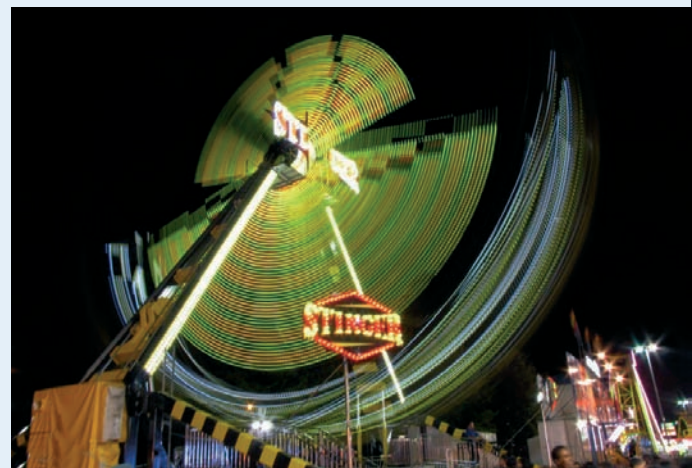

Loop Fighter 16

Inimitable success

This free car looping inversion was the first of its kind and there's still nothing else matching the sensational experience of thrill. The car loop is achieved with the dynamic unbalance created by the swing and spin combination. Acceleration is always controlled and eventually limited within the admissible rang by a magnetic break. Over the $\pm 140^\circ$ arch a mechanical lock holds the cars to enable the formidable full inversion gear. Seats are made of high tech carbon fibre anatomically studied and shaped for superb ride comfort.

**TECHNICAL
PARK**

Meaningful elements:

- Boosted inversion 25 meters
- Prestigious carbon fibre seats
- Exclusive dynamic car loop

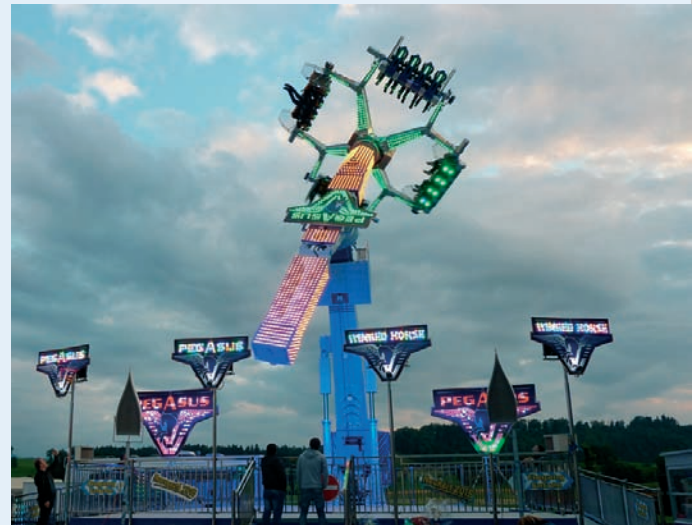

Pegasus 16

Dynamic free loop

On this ride model, the extreme looping effect is weakened by the inclined angle of the swing, allowing a wild control of the car loop. So it can be fully managed at anytime by the operator, even over the ordinary $\pm 140^\circ$ arch and during the full inversion of the main arm! This surprising effect enhances the thrill experience. Anyway acceleration are anyway always controlled and eventually limited within the admissible range by a magnetic break.

**TECHNICAL
PARK**

Meaningful elements:

- Playable car loop effect
- Car loop during full inversion
- Prestigious carbon fibre seats

Pegasus 30

XXL emotion

Dynamic looping effect in the extra large configuration with 30 seat capacity. This ride is an eyecatcher because of the spectacular movement and the minimal suspended structure. Loading is on floor level so high capacity is not wasted and not affected by any platform waiting, excellent queue managing even on busiest days.

**TECHNICAL
PARK**

Meaningful elements:

- Spectacular car loop effect
- Excellent capacity
- Family appeal

Typhoon

Discovery series

With significant innovations we designed one of the most advanced frisbee rides with reduced maintenance need, smooth very silent transimison, boosted fall during back and forth swings. Full revolution model also available. The themes can be revised, upgraded or changed by adapting to a new theme whenever you need to.

TECHNICAL
PARK

Meaningful elements:

- Low maintenance cost
- Boosted drive fall
- 24 or 30 seats

Typhoon Revo

360° extreme revolution

A pendulum ride with counterweight and full inversion 360° arch. This is the latest extreme novelty in the swing rides class. A very spectacular thrill experience considering the imposing dimension and the ppheriferal speed.

TECHNICAL
PARK

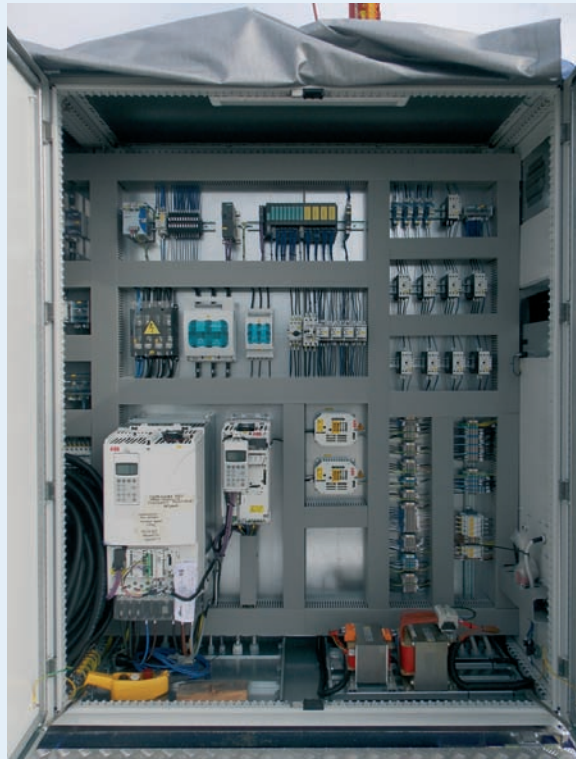

Meaningful elements:

- 360° full revolution
- Silent functioning
- Over 30 meters high
