

TECHNICAL PARK

AMUSEMENT RIDES & FUN CREATORS

FERRIS WHEELS

The World's Fair in Chicago, 1893, was to be a spectacular event: architects, musicians, artists, and inventors worked on special exhibits to display the glories of their countries. But the Fair's planners wanted something really special, something on the scale of the Eiffel Tower, which had been constructed for France's fair three years earlier. At last, engineer George Ferris had a crazy, unrealistic, gigantic idea... this is the story of an icon of amusement, still captivating crowds throughout the world.

Technical Park Ferris Wheels represent high quality and sought after attractions for visitors, a successful replicable business model for many popular destinations.

FW20 Way ahead in front

The size 20 is among the most popular type. And it's no wonder, the way it combines compact design with smart functionality. The original project from Technical Park, FW 20, as such a success that many others followed in its footsteps.

Portable model available

The portable version fit all on one semitrailer only.

This way showmen save not just on set up time but on transport costs too.

FW22 MOBILE

Way ahead in front

The original travelling unit by Technical Park, one of the most popular and copied, have been redesigned to set the new benchmark of the market. The FW 22 is the highest and fastest portable model on one single semitrailer. The innovation set by this new design is enhanced by the most futuristic gondolas, with luminous body and sliding doors.

FW25 Pulse of progress

The tradition-rich manufacturer combines high-tech with classical toolmaking and industrial painting techniques with sophisticated craftsmanship. The customer can choose from several different gondolas: standard, wood style, antique Venetian style or the balloons... and all the colours can be customized!

FW30

Functional design is
visible in every line

The Technical Park versatility is especially visible in the 30 meters size, with a road and a park model construction that combines efficient shape turning into: Space. Effortlessness. Fascination. Above all, the portable version fits all on two semitrailers only.

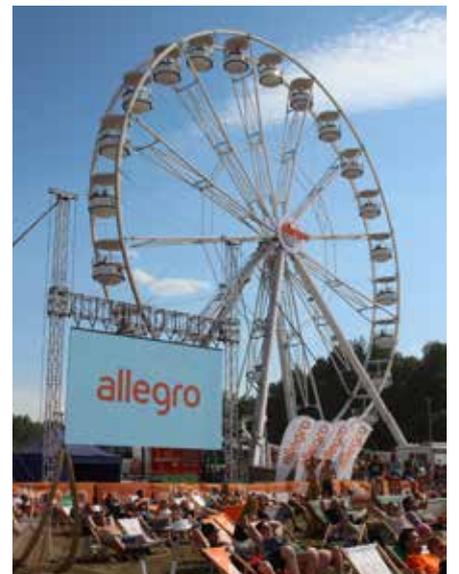

FW32 MOBILE

Developed to meet
new challenges

With its 24 gondolas, it is the highest portable version on central trailer.
The construction is intended for operation at any location and its design complies with all the European wind zones.

FW35 Pure emotion

Another interesting size step, this is a very good compromise for several factors influencing the decision to purchase: "convenience", "dependability", "low first cost", "low cost to operate" and "energy/money savings", because this is the first step to impressive views.

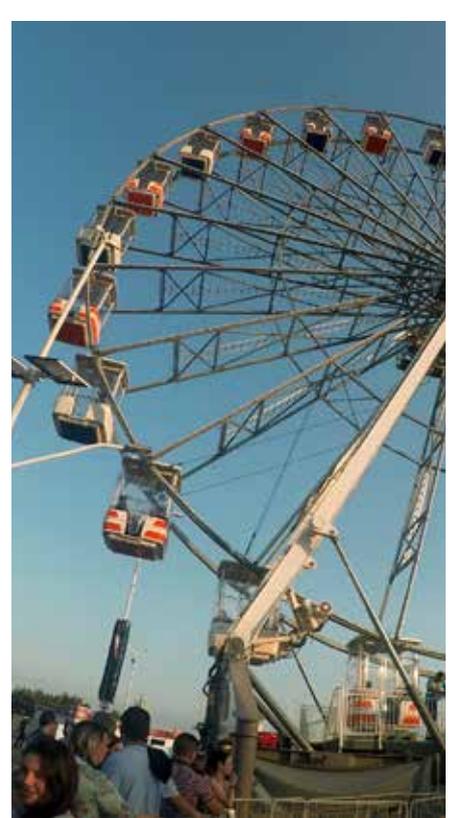

FW35-40 MOBILE Pure emotion

This portable panoramic wheel can be built up without any crane and holds 24 gondolas on the edge of a busy spokes structure (a spoke for every gondola). The base consists of 3 trailers with relevant load speed benefits for the transport configuration. Maximum achievable height with this system is 40 meters.

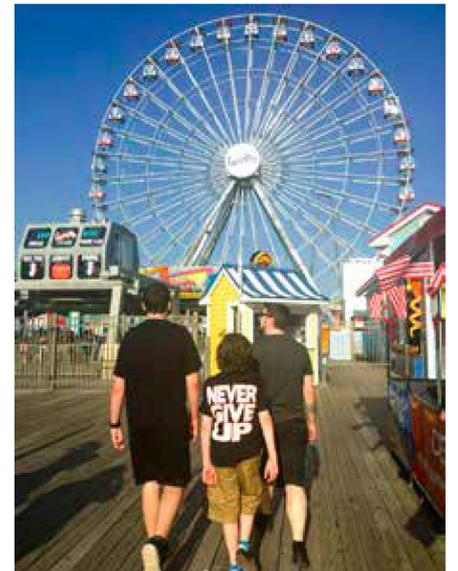

FW40

Born of powerful ideas

The FW 40 project has proven over the years to be one of the most profitable and efficient structures. Designed and manufactured from a standard and serial produced design, the FW 40 can be installed in an economic timeframe that cannot compete with others.

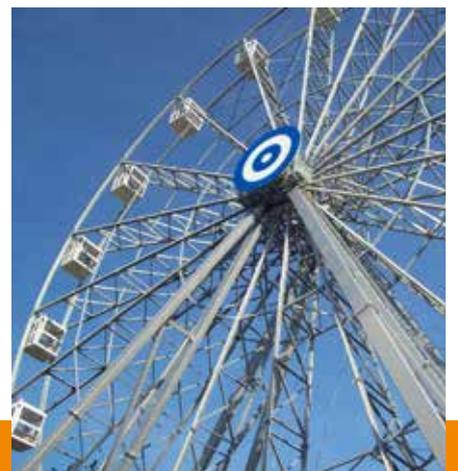

FW45

Born of powerfull ideas

The FW 45, strictly derived from the FW 40 structure, is an excellent solution to create an icon in any major city of prestigious location around the world. Within an affordable budget it is equipped with large cabins (all of them wheelchair friendly with foldable seats). Led Lighting, air conditioning, minibar, table, PA system and a wide range of other optional are available as well as the interesting self-standing basement option if needed for local restrictions.

FW45 PORTABLE Powerfull ideas

The portable FW45 is an incredible turn key business because of the high demand from all the mayor city and prestigious location around the world. VIP and wheelchair friendly gondolas are just some of the long list of options available to customize your business project.

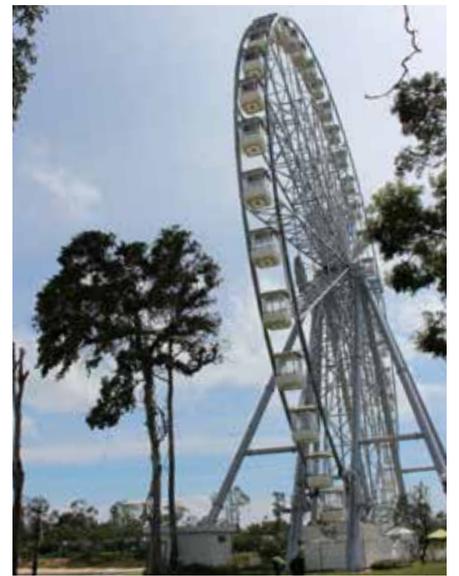

FW55 The art of progress

It's attractive and timeless icon, probably the best size in the giant wheels range because of functionality and efficiency, really one of the state-of-the-art stand-alone tourist attractions. Open or closed cabins configurations are both available, fitting the same structure.

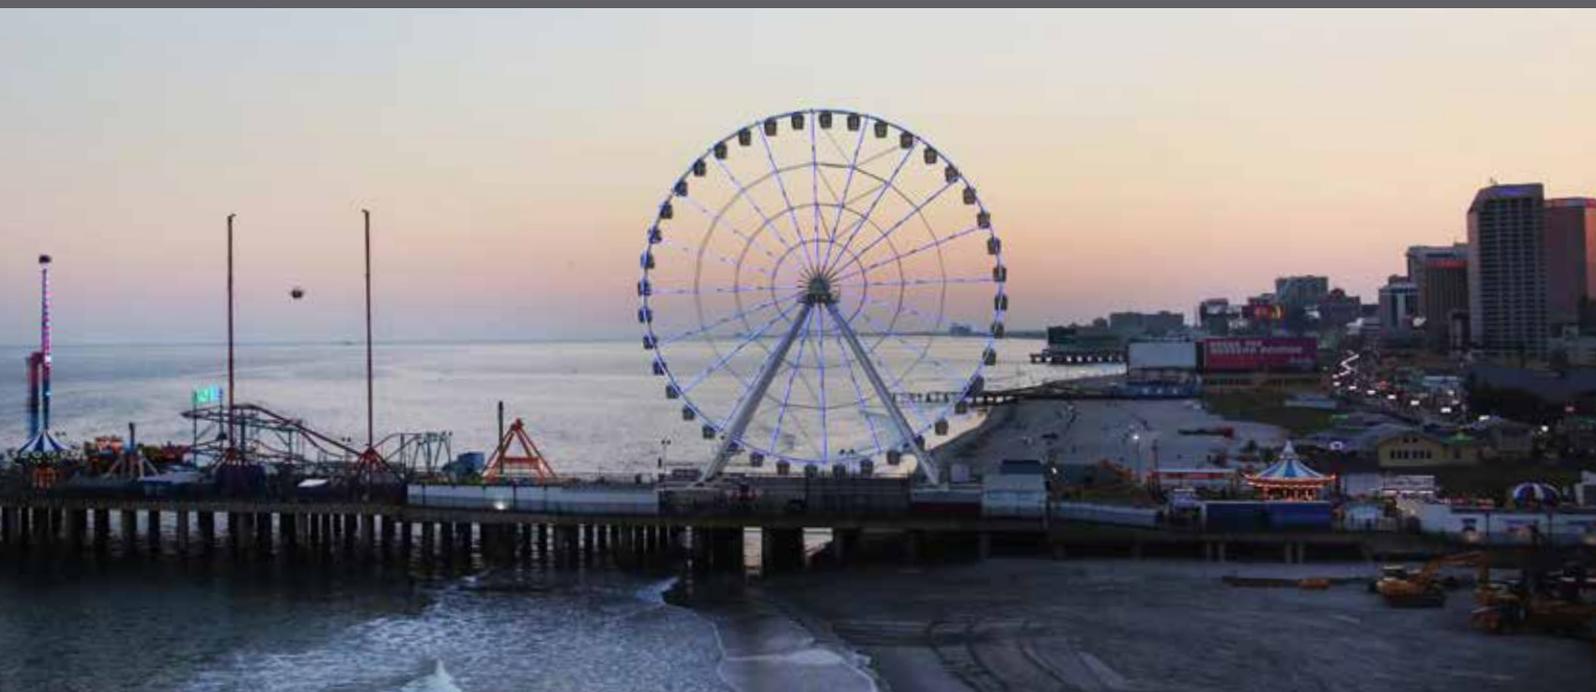

FW60 The art of progress

The FW 60 is acknowledged as one of the best return on investment for observation wheels. It rests on a compact footprint and is extremely efficient to install and operate. Several closed cabins configurations are available to customize the interiors.

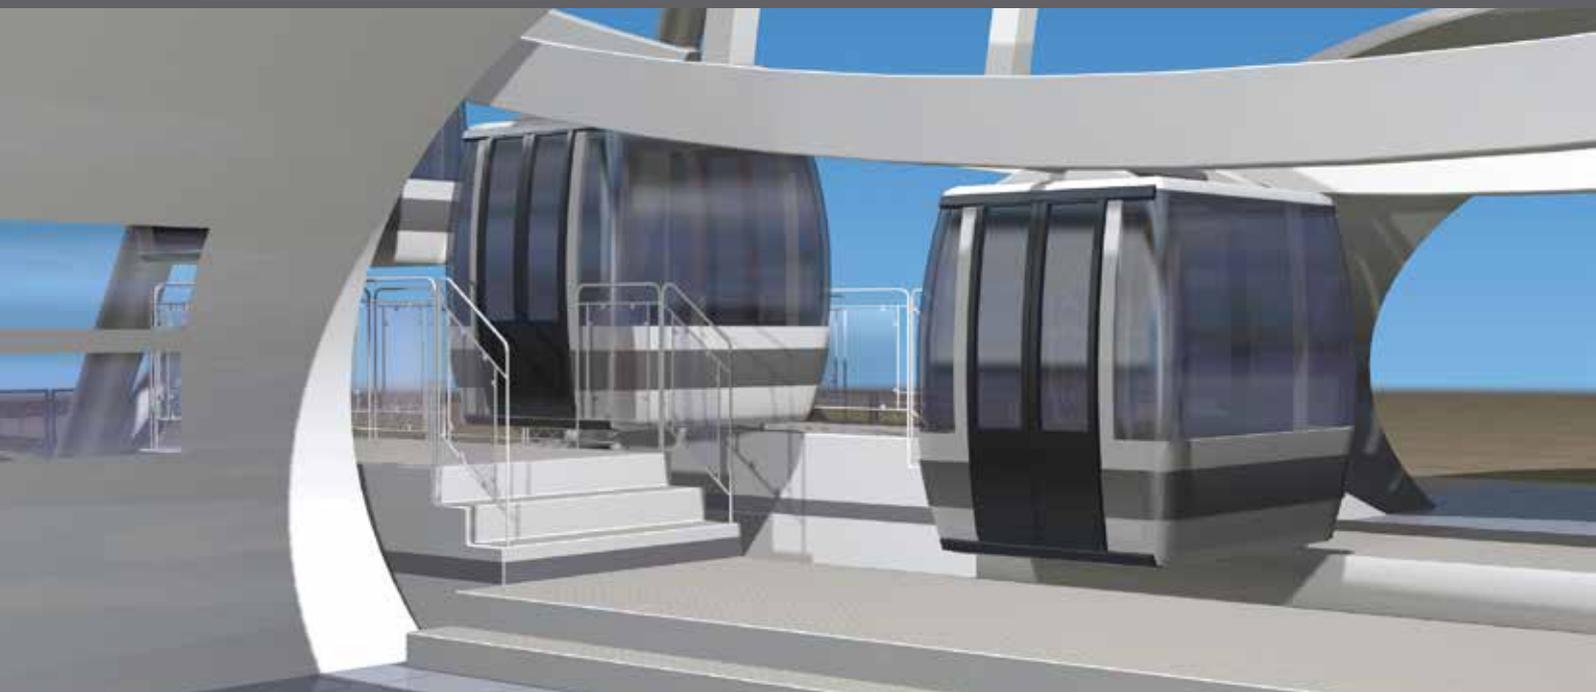

FW80

Enough adrenalin
to go high

The Ferris Wheel 80 Mt belongs to the higher class of the giant wheels. This gigantic creation offers 40 large cabins developed and designed to be implemented with specific domotic and intercom functions.

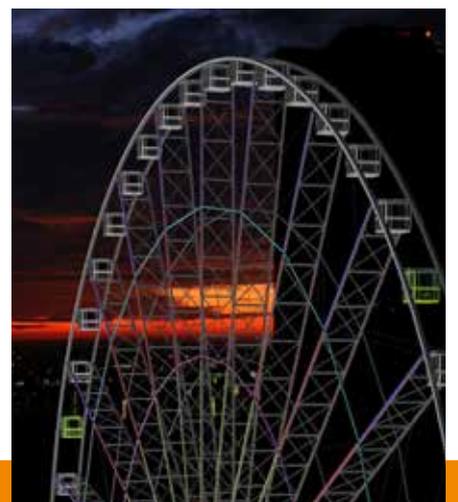

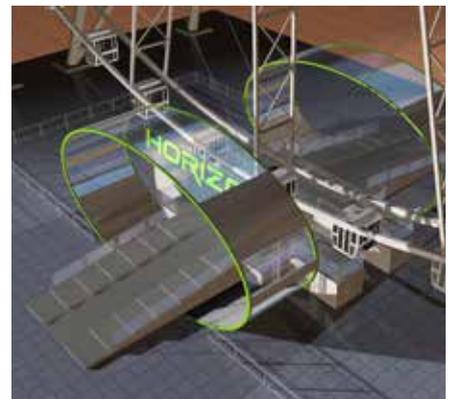

FW100 Time for a new legend

Anyone who sets out to make a Giant wheel to meet the most exacting requirements is taking on one of the great challenges in all of amusement engineering.

It is here that technical precision and resistance are stretched to the limits of what is possible to withstand the most severe environmental conditions. Certainty and state-of-the-art know how covering all aspect from the planning to the operation are indispensable to be recognized as a reliable and expert manufacturer.

GONDOLAS

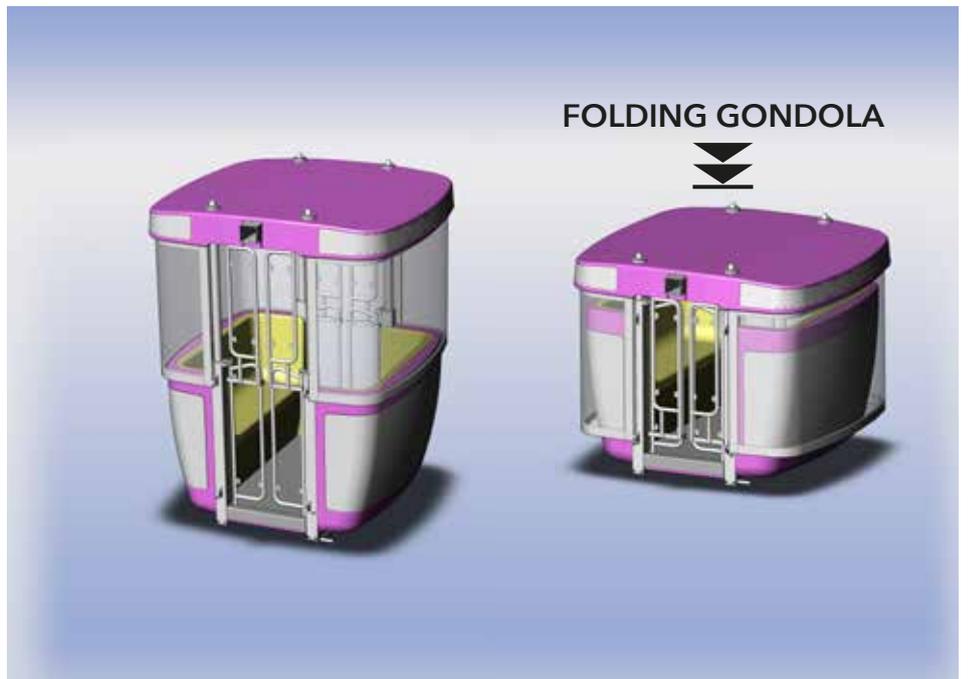

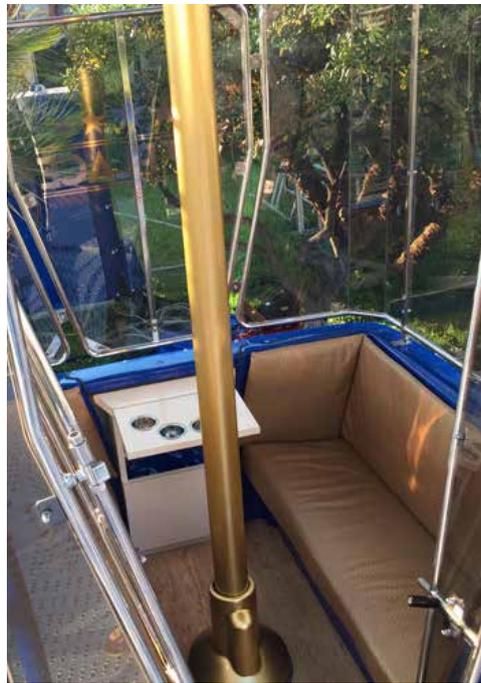

Limitless creativity

Anyone who sets out to make a Giant wheel to meet the most exacting requirements is taking on one of the great challenges in all of amusement engineering.

It is here that technical precision and resistance are stretched to the limits of what is possible to withstand the most severe environmental conditions. Certainty and state-of-the-art know how covering all aspect from the planning to the operation and are indispensable to be recognized as a reliable and expert manufacturer.

RGB GONDOLAS now at 6 seats

Great innovation with sliding doors and RGB lighting effect
now with extra large seats to accommodate up to 6 passengers

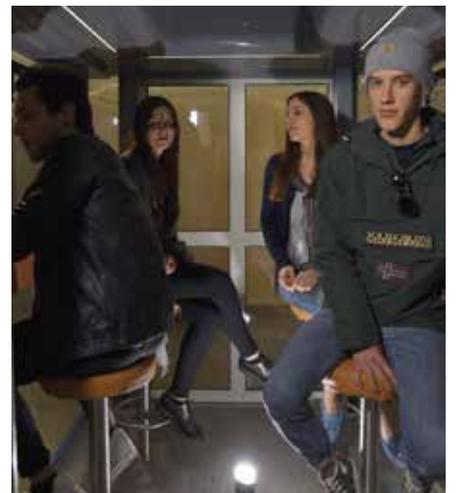

CABINS

Luxury experience

Large cabins offer passengers much more space inside as well as wider boarding areas, combined with a distinctive luxury design. Automatic function combined with slow speed motion give passenger time to board and alight in complete safety and without stress.

ASSEMBLY Smart portable solutions

The Ferris Wheel is an icon and represents the state-of-the-art stand-alone tourist attraction. For temporary locations we designed and developed dedicated solution for economic and efficient installation, by using bolt and pin connection to avoid welding and conservation on destination jobsite.

Confidentiality is an important part of the long term relationships we build with our clients.
